SUMMARY

B.Tech Computer Science student with a strong foundation in Governance, Risk, and Compliance (GRC), technology risk, and process controls. Experienced in system audits, control validation, SDLC understanding, data analysis, and structured documentation through internships and academic projects. Detail-oriented, analytical, and well-suited for consulting roles involving SAP GRC, technology risk, and enterprise process assurance.

EDUCATION

2023 – 2026	B.Tech (CSE), PES University	(Current CGPA: 7.46 / 10)
2019 – 2022	Diploma (CSE), PES Polytechnic	(Percentage: 73.1)

GRC & TECHNOLOGY SKILLS

Governance & Compliance:	IT controls, process controls, audit support, policy adherence
Technology Risk:	Risk identification, control testing, RCA, issue tracking
SDLC Knowledge:	Requirements, development, testing, deployment, maintenance
Data & Analytics:	SQL (basic), Excel analysis, data validation
Programming:	Python (basic), JavaScript fundamentals
Systems:	Linux fundamentals, access management concepts
Documentation:	SOPs, audit evidence, control narratives
Productivity & AI Tools:	Use AI tools to accelerate implementation while independently designing logic, validating controls, and ensuring correctness

KEY PROJECTS

- **Inventory Dashboard (React + REST APIs)** :
 - Built a web-based dashboard to track inventory metrics and validate operational data.
 - Used SQL and Python to detect inconsistencies and surface actionable insights.
 - Designed the solution by gathering requirements, defining workflows, and iterating based on user feedback.
 - Focused on reliability, clarity, and ease of use for non-technical stakeholders.
- **Urban-Connect** :
 - Implemented backend workflows with role-based access, validations, and logging.
 - Troubleshoot integration issues and ensured reliable system behavior.
 - Documented APIs and workflows for long-term supportability.
- **ML-Based Network Security (Capstone, Ongoing):**
 - Developed a metrics-driven monitoring pipeline to detect anomalies in system behavior.
 - Applied structured troubleshooting and analysis to reduce false positives.
 - Strengthened understanding of observability, reliability, and scaled systems.

CERTIFICATIONS & LEARNING

- **Deloitte Cyber Simulation (Forage):** Hands-on exposure to incident response, system risk analysis, and secure workflows.

BEHAVIORAL COMPETENCIES

- Strong attention to detail and structured thinking
- Agile mindset with ability to multi-task
- Clear written and verbal communication
- Collaborative team player with consulting mindset
- Curious, adaptable, and eager to learn enterprise technologies
